Change over time

Something that changed, or a story that unfolded. Two answers under every prompt, to show how little a line needs to say. On your own sheet you only answer the ones that spark something.

FROM YOUR OWN LIFE

A building near you that used to be something else. The bank on the high street. It's a bar now. The chapel at the end of our road is a carpet shop.	**A shop, café or venue you used to go to that has closed or changed.** The skate park café we went to after school. Shut in lockdown. Woolworths in town. Three different shops since.
A field, wood or patch of land near you that has been built on. The field we played football on is a Lidl car park. The woods by the bypass, half cut down for new houses.	**A park, river, beach or green space near you that has changed.** The canal used to be full of trolleys. Now there are kayaks. The beach at Hornsea. The cliffs keep falling in.
Something about where you grew up that's different from when you were small. No bus into town after six any more. The pub on our estate became a Tesco Express.	**A job that a machine or an app now does.** Self-checkouts at the Morrisons where I worked. Bank tellers. My mum was one.
A music, gaming or online scene you're part of that has changed since you got into it. Fortnite since Chapter 1. The map never stays the same. Drum and bass nights, from tiny clubs to festivals.	**An app, website or piece of tech everyone used that has disappeared.** Club Penguin. Vine. Six-second videos, then gone.
Something you buy that costs a lot more than it used to. A Freddo. It was 10p. Gig tickets. £15 then, £60 now.	

FROM THE WIDER WORLD

A person, famous or local, with a life story worth telling. Ada Lovelace, the first programmer. Anne Lister of Shibden Hall, Halifax.	**An expedition, voyage or journey that you find interesting.** Amy Johnson flying solo from Croydon to Australia, 1930. Shackleton's lifeboat trip to South Georgia.
A race, rivalry or record attempt. Blur versus Oasis, 1995. The four-minute mile.	**A disaster, rescue or escape.** The Thai cave rescue, 2018. The Titanic's lifeboats. Who got a seat, and why.
A mystery that was never fully solved. The Mary Celeste. Flight MH370.	**A moment in history you'd like to see from the inside.** Mission control during the Moon landing. The first night of the Blitz.
A town, coastline or landscape that looks completely different from a hundred years ago. Leeds city centre, a hundred years ago and now. Skipsea, where houses are falling into the sea.	**A glacier, forest or river that has shrunk or grown.** The Rhône Glacier, wrapped in blankets every summer. Kielder Forest, planted from almost nothing.
An animal, plant or habitat that is disappearing, or coming back. Red kites round Harewood, back since 1999. Hedgehogs. Fewer every year.	**An invention that changed how people live.** The washing machine. The smartphone.
A band, brand, club or company that rose and fell. Blockbuster. Leeds United. Champions League semi-final to League One.	

Explainers

How something works, or how to do it. Two answers under every prompt. A few words is enough: you do not need to know any facts yet.

FROM YOUR OWN LIFE

A hobby or skill that you'd like to educate people on. Bouldering. It's mostly footwork, not arm strength. Film photography. Loading a roll without ruining it.	**Something you know more about than anyone else in this room.** Painting Warhammer figures. Lambing. I grew up on a farm.
Something about a job you've done that customers never see. The closing shift at the restaurant. The cleaning list is huge. What happens to your returns at the warehouse.	**A place you've seen behind the scenes: a kitchen, warehouse, stage or stadium.** The kitchen at the Italian I work at on a Saturday night. Backstage at the panto.
The rules of a sport or game that newcomers might find confusing. The offside rule. Cricket. Why one match lasts five days.	**An interesting dish you cook that involves a number of steps.** Proper Yorkshire puddings. Ramen from scratch. The broth takes a day.
Something you collect that most people wouldn't know about. Old Nokia phones. Vinyl test pressings.	

FROM THE WIDER WORLD

Something you've always wondered how it works. How noise-cancelling headphones cancel noise. How planes stay up.	**Something you use every day without knowing how it works, like a contactless card or a fridge.** How a contactless card pays with no battery. How a microwave actually heats food.
How an instrument or piece of kit makes its sound, like an electric guitar pickup. How a talk box works. Why a Strat sounds different from a Les Paul.	**What a production role actually involves, like a cinematographer.** What a Foley artist does. What a colourist does on a film.
A practical skill done properly, like sharpening a knife. Tying a bowline. Changing a bike inner tube.	**How something gets made, from raw material to shop shelf.** A pair of jeans, from cotton field to shop rail. A bag of crisps.
How something is built: a bridge, a ship, a stage set. The Humber Bridge. A stage for a stadium tour.	**A place you'd like to walk someone through: a cave, a ship, a castle, a mine.** A coal mine, 140 metres down. The inside of a submarine.
How a big system works behind the scenes: the power grid, the post, a football transfer. How a parcel gets from the warehouse to my door. How the National Grid copes when everyone puts the kettle on.	**How a meme or video takes off and spreads.** How a TikTok sound goes viral. Why some memes come back years later.
Why something happens: tides, the northern lights, a traffic jam with no obvious cause. Why the northern lights reached Yorkshire in 2024. Why leaves on the line delay trains.	**How an animal or plant does something remarkable.** How starlings murmurate without crashing. How a Venus flytrap counts.
